

Features and Benefits

These protectors are available in two lengths - 61mm and 45mm, whilst offering an installed outside diameter of only 2.4mm. Each Splice protector is reinforced by a stainless steel pin to BS2056 302 S26 specification, thus ensuring the maximum possible protection for the delicate fusion splices.

To install, simply slide the protector over the fibre prior to splicing. After completion of the splice, heat shrink it into position to give permanent protection to the splice area.

- Steel pin reinforcement.
- 2.4mm outside diameter.
- Colour : Transparent
- Two lengths available 45mm and 61mm

Packaging :

Bag of 100 protectors.

Shipping Weight :

5g per bag.
